TRANSFORMING LEGACY OPERATIONS INTO INTELLIGENT, AI-READY MICROSOFT CLOUD ENVIRONMENTS

i5 Technology Group is a Microsoft AI Cloud Partner specializing in modernizing legacy systems, automating business processes, and delivering intelligent cloud solutions using Microsoft 365, SharePoint Online, and the Power Platform. We help federal and commercial organizations transition from manual, on-premises environments into secure, scalable platforms optimized for automation, analytics, and AI-driven productivity. Our solutions eliminate operational bottlenecks, improve visibility, and prepare organizations for Microsoft Copilot and emerging AI capabilities.

CORE COMPETENCIES

Comprehensive Assessments and Strategic Planning

- SharePoint Server to SharePoint Online migration and modernization
- Replacement of InfoPath and legacy workflows using Power Platform
- SharePoint on-premises end-of-life readiness and modernization
- Legacy system modernization supporting mission-critical operations

Intelligent Automation & Applied AI Solutions

- AI-assisted document processing using OCR and automation
- Workflow automation using Power Automate and Power Apps
- Custom business applications improving operational efficiency
- Automation frameworks supporting Microsoft Copilot readiness

Operational Intelligence & Executive Decision Support

- Power BI dashboards providing real-time operational visibility
- Centralized reporting environments supporting compliance and oversight
- Enterprise data integration improving leadership decision-making

Digital Workplace Modernization & Collaboration

- Microsoft 365 and SharePoint Online implementation and optimization
- Automated document management and approval workflows
- Modern intranet and collaboration solutions confidence.

INNOVATION & MODERNIZATION HIGHLIGHTS

U.S. Marshals Service

- Modernized enterprise reporting system supporting 96 districts using Power Platform and Power BI, eliminating manual processes and improving operational visibility.

Federal Law Enforcement Agency

- Replaced legacy SharePoint and InfoPath-based procurement system, reducing approval delays by over 65% and establishing a reliable system of record.

Trex Company, Inc. — InvoiceXpert

- Designed AI-enabled automation system to eliminate manual invoice processing bottlenecks that resulted in late payment penalties and missed early-payment discounts, improving financial performance, vendor relationships, and operational efficiency.

Enterprise SharePoint Modernization Initiatives

- Migrated and modernized legacy SharePoint environments to secure, scalable cloud platforms aligned with AI and Copilot readiness.

PAST PERFORMANCE

COPILOT & AI READINESS

Preparing organizations for Microsoft Copilot through legacy system modernization, workflow automation, and structured Microsoft 365 environments optimized for AI-driven productivity and operational insight.

DIFFERENTIATORS

- Microsoft AI Cloud Partner with proven enterprise delivery experience
- Demonstrated success modernizing mission-critical federal and commercial systems
- Specialized expertise in SharePoint on-premises modernization and Copilot readiness
- Deep Power Platform application development and automation expertise
- Proven ability to eliminate manual processes and improve operational efficiency
